The Problem

Buying a laptop in Nepal today is guesswork, not decision-making.

Prices vary wildly

The same laptop can differ drastically in price across Nepali stores.

Inconsistent titles

Confusing, non-standard product names make listings hard to trust.

Specs, not comparable

Users can't easily compare specs side-by-side to judge value.

Hidden issues ignored

Thermal performance and battery health rarely get flagged upfront.

Specz
Browser Extension

The Solution

Seamlessly integrates in the browser to detect products, normalize specs with AI, and show side-by-side comparisons across Nepali stores with actionable buying guidance.

Auto-detects product

Recognizes the laptop you're viewing on any store page instantly.

Compares prices across stores

Pulls prices from multiple Nepali retailers for a real comparison.

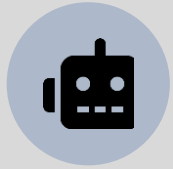

Gives smart buying advice

Delivers an AI-backend recommendation on real value for money.

Product Demo

The extension popup at work on a live product page

Key Features

AI Smart Matcher

Matches identical products across listings and stores.

Cheapest Price Detection

Surfaces the lowest verified price automatically.

Value Analysis

Scores value for money for laptops.

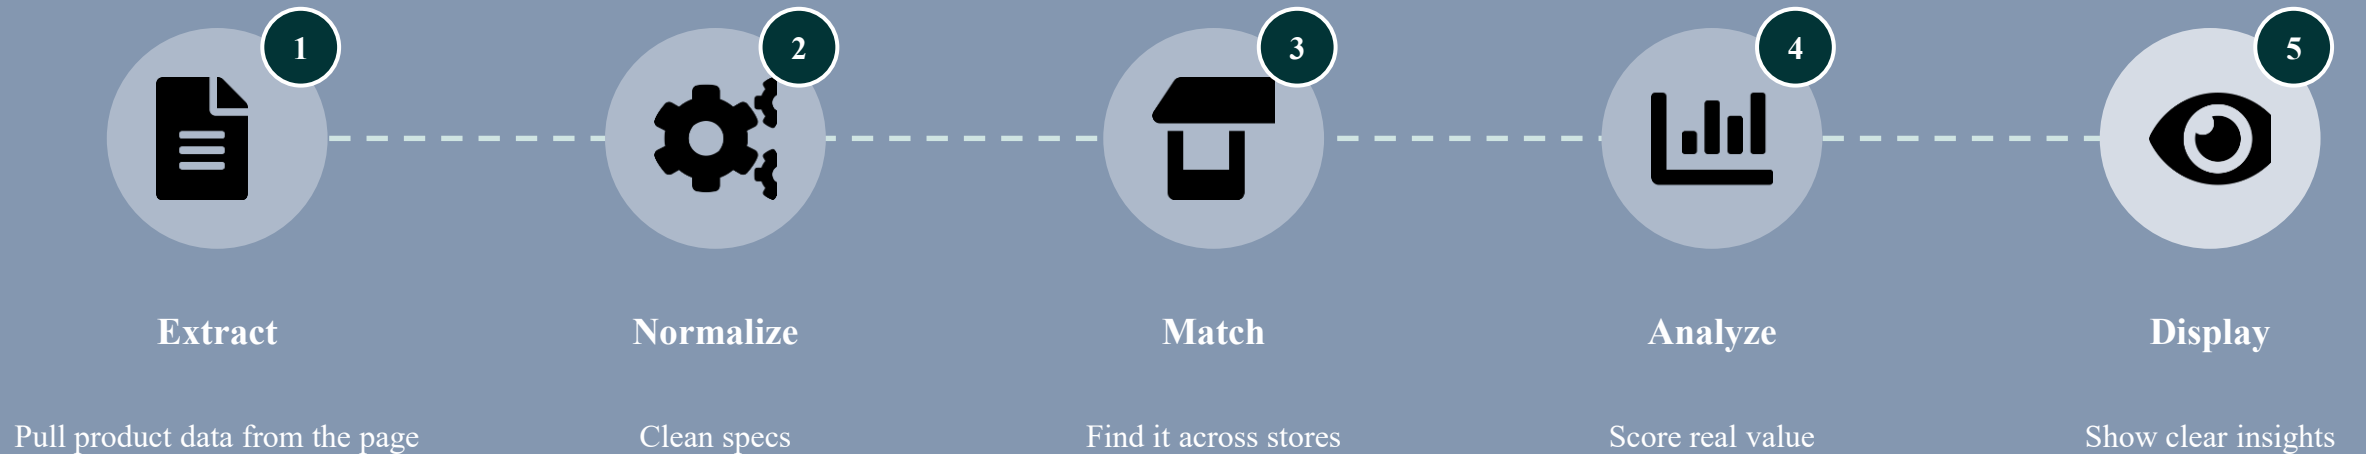

Wishlist

Track laptops and get notified when prices drop.

How It Works

From page load to purchase decision in five steps.

Behind the scenes: lightweight client-side extraction + secure API calls to AI and store-matching services — optimized for speed and privacy.

Tech Stack

Lightweight, modern, and built to ship fast.

Chrome Extension

Built on Manifest V3 for speed and security.

Groq API

Powers spec normalization and AI recommendations.

Playwright and Chromium Scraping

Automated web data extraction from e-commerce websites

HTML, CSS

Structure and interface styling

chrome.storage

Persists wishlist and user preferences locally.

Node.JS

JavaScript runtime for backend development

Market Impact

Nepali Tech Buyers

Directly targets a fast-growing, price-conscious market segment.

Multi-Store Coverage

Works across Daraz, ITTI, Evostore and Hukut from a single popup.

Real Transparency

Solves a genuine trust and information gap in local e-commerce.

Future Scope

Best time to Buy

Should I buy now or when?

Price History Tracking

Show trends so buyers know when a price is genuinely good.

Affiliate Monetization

Sustainable revenue through store partnerships.

Mobile App Version

Bring the same insights to on-the-go shoppers.

*“Don’t just buy cheaper.
Buy smarter.”*
